

Python Developer (Web scraping)

[Apply Now](#)

Company: NielsenIQ

Location: Sidi M'Hamed

Category: computer-and-mathematical

Job Description

The very rapid development of e-commerce today gives access to thousands of information. These data are difficult to exploit by companies, which then have difficulty choosing the right levers of action and measuring their impact.

This is where Data Impact by NielsenIQ comes in! Every day, we collect more than 60 billion pieces of information, process them and use them in innovative monitoring and action tools for professionals in the sector. Our goal: to give our customers and consumers real-time visibility into the market. Today: Data Impact by NielsenIQ is a leading start-up in the 'Retail Analytics' sector. In full growth, particularly internationally, we are looking for new collaborators to join our fabulous team! A young but experienced, dynamic and complementary team: a resolutely start-up spirit! Real job and career opportunities A friendly atmosphere and a climate of trust that promotes autonomy and challenge!

Responsibilities:

As a Python Developer within the "scraping" team, you will join our talented and passionate Data & Infrastructures team to help us optimize data collection!

Realization of spiders for scraping

Organization of spiders in the cloud

Documentation of spiders

Qualifications

CS/IT or equivalent qualification

Have minimum of 1 year of experience including internship.

Must have experience in HTML, Javascript and Python

Must have experience in REST and SOAP

Good to have knowledge of the Scrapy-python library.

You are enthusiastic, motivated, autonomous.

You like challenges.

You are passionate about tech.

Additional Information

Enjoy a flexible and rewarding work environment with peer-to-peer recognition platforms.

Recharge and revitalize with help of wellness plans made for you and your family.

Plan your future with financial wellness tools.

Stay relevant and upskill yourself with career development opportunities.
